Jewers Doors Completes Major Hangar Door Installation at British Airways Fleet Support Unit, Heathrow Airport

Heathrow, UK - Jewers Doors has successfully completed a major installation project at British Airways' Fleet Support Unit (FSU) at Heathrow Airport, one of the world's busiest airports.

The project involved the supply and installation of two sets of Esavian 126-SBR power-operated hangar doors, each comprising 10 equal leaves, with 10 installed on the north side and 10 on the south side of the hangar.
Each door leaf measures 9 metres wide, by 21 metres high, and weighs approximately 17.5 tonnes. The scale of the project required bespoke design and precise engineering,

underscoring Jewers Doors' ongoing commitment to innovation, quality, and high-performance solutions for the aviation sector.

The removal of the existing hangar doors and installation of the new systems presented a significant logistical challenge, particularly within the operational constraints of Heathrow Airport. Jewers Doors completed the work efficiently, ensuring minimal disruption to airport operations throughout the project.

This successful installation further strengthens Jewers Doors' reputation as a leading provider of specialist industrial and aircraft hangar doors, trusted by major aviation and industrial clients around the world. Backed by more than 40 years of experience, the company continues to deliver tailor-made door solutions designed to meet the evolving needs of its customers.

More about Jewers Doors

Established in 1983 and still a family run business, Jewers Doors is a world-leading supplier of industrial doors operating from a brand-new state-of-the-art facility constructed in 2021 in the heart of Bedfordshire. With over 60 highly skilled and experienced staff, the core of the business is design, manufacture, installation, and repair of industrial door solutions across all industrial sectors. The Phoenix range of doors are designed for medium to large industrial applications, while the Esavian range is recognised as one of the world’s leading range of aircraft hangar doors. Incorporating the very latest concepts and technologies, Jewers Doors have been installed not only in the UK, but also throughout the world including Europe, Middle East, Far East, North America and Australasia.
