

## Abacus Motorhomes count on Jewers for new Andover HQ

### SUMMARY

#### Overview

Industry: Hospitality

Solution: Osprey manual Sliding/folding doors (OSP-M)

#### Benefits

- No need for a power supply.
- Easy to open and close by hand.
- Leaves fold back behind each reveal completely clear of the opening.
- Extremely durable and low maintenance.
- Weather tight seals tested to Class 2 Air Permeability and Class 3 Water Leakage.

#### About Jewers Doors Ltd

Jewers Doors is a world-leader in the design, manufacture, installation and repair of industrial doors across all industrial sectors.

Jewers Doors have been installed not only in the UK, but also throughout the world including Europe, Middle East, Far East, North America and Australasia.

Working with local contractor Jade Aden Services Ltd, Jewers Doors have recently supplied and installed two sets of Osprey manually operated sliding-folding doors for Abacus motorhomes at Andover Business Park in Hampshire.

Like Jewers, Abacus Motorhomes is a family business established for over 30 years, and on the back of a booming 'Staycation' Industry they completed their new purpose-built headquarters for renting out motorhomes in 2022.

#### The Brief

The client wanted aesthetically pleasing, modern looking doors for their openings which provide full height and full width clearance for two or three of their oversize vehicles. Doors were to be hand operated to minimise moving components and ultimately maintenance, easy to secure and light enough to be moved by one person.

#### The Solution

Two sets of Osprey manually operated doors (OSP-M) were installed to each 10 metre wide x 4 metre high opening on the Maintenance & Repair and Vehicle Wash bays. Each door is configured in 12 leaves with 6 leaves fully floating, and folding to each side clear of the opening. The door on the vehicle wash bay was fitted with vision panels in 4 of the leaves to increase internal illumination. Both have full height espagollette bolts to the inside with built in pull handles to instantly unlock and fold the door in a single action.

#### Robust and Reliable

Although factory tested for over 250,000 continuous operations as an electrically operated door, Osprey doors are becoming more popular in their manual format due to reduced cost and the global shortage of electrical components.

Soft compound EPDM weather seals to all edges greatly reduce water, air and dust ingress, and provide full finger trap protection during operation.

Jewers Doors are a DHF accredited company and operate under strict guidelines to advise on the best and safest solution for each application and provide an expert service that is second to none.
