

ENVIRONMENTAL POLICY STATEMENT

Jewers Doors Limited have established a reputation as international market-leaders in the design, manufacture, installation, repair and service of its specialist industrial and aircraft hangar doors. It aims to maintain and grow that reputation by continuing to deliver excellent and safe products and service across its market place.

In order to help it meet these aims, the organisation chooses to operate an Environmental Management System (EMS) which is designed in accordance with the requirements of ISO 14001:2015.

Directors and Senior Managers (our “Top Management”) recognise the importance of their leadership in ensuring that the EMS is as effective as possible in all areas that it touches. As such, Top Management are committed to:

- The prevention of pollution to the environment.
- Fulfilling our responsibilities with regards to environmental legislation and compliance obligations.
- The conservation of resources through efficient design of products and effective planning of projects.
- The reduction of waste and fugitive emissions at source, and by following the waste hierarchy principles.
- The establishment of environmental risk management measures designed to minimize the likelihood and severity of environmental incidents.
- Establishing relevant indicators to help us continually improve.
- The provision of appropriate information, instruction, training and supervision to all members of staff or those who are working for the organisation to ensure our stated and intended aims are met.

Our employees and other parties engaged by our organisation are expected to co-operate and contribute to the implementation of this policy, whilst always ensuring that their own work, so far as is reasonably practicable, is carried out without risk to themselves, others, equipment or quality.

This policy will be reviewed annually by Top Management and where considered necessary, it will be updated and re-issued.

Signed

(Chris Jewers, Managing Director)
