

Jewers Doors receives JOSCAR accreditation

Joint Supply Chain Accreditation Register (JOSCAR)

Jewers Doors are proud to announce they have been successfully accepted on to the JOSCAR register and are now recognised as a fully compliant supplier to prime contractors and several major defence organisations.

JOSCAR is the accreditation and compliance system for the defence aerospace sectors including prime contractors, civil aviation and security.

It is a collaboration solution which reduces the time, cost, resources and duplication needed to provide information to major customers. It collects, validates and maintains supplier information used by buyers to help with procurement compliance, making it a trusted source of information.

The JOSCAR accreditation was established following an initiative led by ADS Group and includes a growing number of prime contractors as registered buyers. Current organisations in their buying community include:

- BAE Systems
- Babcock International
- QinetiQ Group PLC
- NATS
- Leonardo UK
- Ministry of Defence
- MBDA Systems
- General Dynamics UK Limited
- Rolls Royce Submarines
- Roke Manor
- Leidos UK
