

## News Release

# **Jewers opens the Doors at the new Headquarters of Lincs & Notts Air Ambulance**

Lincolnshire & Nottinghamshire Air Ambulance moved into their new charity headquarters in May 2021. It is situated just off the A15 Sleaford Road opposite RAF Waddington, which was home to LNAA's helicopter since 1994.

The new airbase features a purpose-built hangar with space to enable on-site engineering, a bespoke helipad equipped with state-of-the-art landing lights and enhanced training facilities for crew members.

Working with contractors Lindum Construction, Jewers Doors supplied and installed a set of Osprey (OSP-E) sliding folding doors for an opening 20 metres wide x 6 metres high. The top hung Osprey door is electrically operated and has an integrated wicket door incorporated into one of the panels for pedestrian access. Each door half is driven by a powerful inverter-controlled drive unit which moves each of the 10 leaves effortlessly across the opening and then folds them into a 1m<sup>2</sup> footprint behind the opening. This large door is installed with several sensors providing an invisible zone around the door leaves to prevent the doors impacting a person or aircraft during opening and closing.

For the 'Rear Vehicle Access Door' the client specified an automatic Swift folding door for an opening 3 metres wide x 2.5 metres high. The door is electrically operated in 4 leaves, with 2 leaves folding to each side clear of the opening. It is remotely activated from inside the hangar and closes

automatically once the vehicle leaves. Again, full personnel and vehicle protection is provided at all times to minimize risk to both the door and the vehicle.

#### **More about Jewers Doors**

Established in 1983 and still a family run business, Jewers Doors is a world-leading supplier of industrial doors operating from a state-of-the-art facility in the heart of Bedfordshire. With over 50 highly skilled and experienced staff, the core of the business is design, manufacture, installation and repair of industrial door solutions across all industrial sectors. The Phoenix range of doors are designed for medium to large industrial applications, while the Esavian range is recognised as one of the world's leading range of aircraft hangar doors. Incorporating the very latest concepts and technologies, Jewers Doors have been installed not only in the UK, but also throughout the world including Europe, Middle East, Far East, North America and Australasia.
