

## News Release

### **Jewers' Osprey Doors refurbish 'Open Havelock' project in Southall**

'Open Havelock' in Southall, London, is a design led and socially engaged project that transforms and converts derelict ground floor garages and associated public space within a 1970's housing estate into a community facility for local people to enjoy.

Upon completion, it will include a community gym, a canoe club, a multipurpose room, storage facilities, and a toy library for children, as well as a kitchenette with changing and toilet facilities.

Working with Rise Contracts Ltd and architect; Alison Crawshaw, Jewers designed, manufactured, and installed 16 sets of special Osprey folding doors for openings approximately 2000mm wide by 2200mm high for the project – some of the smallest doors we have ever made, but possibly the most involved.

The architect's brief called for a simple folding door finished to a very high standard, while still retaining an industrial and robust feel, hence the modern appearance of our Osprey door worked well.

Doors are configured in 3 leaves fitted within a made to measure cold-rolled steel frame with a built-in threshold plate and a discreet top track. The odd leaf is used as a pass door when the full opening is not required and is fitted with a pair of lever handles and two deadlocks for additional security. Each leaf is fitted with a 300mm wide by 1500mm high double-glazed window to allow plenty of

light into the garages. The door leaves, door frame, top track and window frames are powder coated to match, and special hardware colour matched and selected to suit the architects' specific requirements.

Specifications of bespoke doors are a service that Jewers Doors can offer on request, and we welcome the opportunity to discuss.

### **More about Jewers Doors**

Established in 1983 and still a family run business, Jewers Doors is a world-leading supplier of industrial doors operating from a state-of-the-art facility in the heart of Bedfordshire. With over 50 highly skilled and experienced staff, the core of the business is design, manufacture, installation, and repair of industrial door solutions across all industrial sectors. The Phoenix range of doors are designed for medium to large industrial applications, while the Esavian range is recognised as one of the world's leading range of aircraft hangar doors. Incorporating the very latest concepts and technologies, Jewers Doors have been installed not only in the UK, but also throughout the world including Europe, Middle East, Far East, North America, and Australasia.
