

Rhino Engineering Group announces new commercial partnership with Jewers Doors

Rhino Engineering Group and Jewers Doors Ltd are pleased to announce the launch of a new partnership which will see Rhino proactively selling Jewers' Phoenix range of insulated sliding and sliding/folding doors.

Jewers' door systems operate similarly to Rhino's own range of high-security vehicle access doors and will be offered to customers requiring a more cost-effective solution than Rhino's CPNI doors, which are typically designed for use within sites which require high-security solutions.

The Phoenix range will sit as complementary to Rhino's existing range of products and provide its customers with the ability to source a wider choice of doors, with different ratings and capabilities, from a single source.

This new partnership will see Rhino selling three doors from the Phoenix range - Osprey, Swift and Kingfisher - and branding these as Rhino-SFI, Rhino-FI and Rhino-SI, respectively. Rhino-SFI will be the sliding/folding variant, while Rhino-FI and Rhino-SI will be bi-folding and sliding only, respectively.

As part of this new agreement, Rhino Site Systems Limited, the in-house door installation and maintenance wing of Rhino Engineering Group, will also become an approved installer for the Phoenix door range.

Stuart Lawrence, Group Managing Director of Rhino Engineering Group, said: "We're delighted to be embarking on this new collaboration with Jewers Doors, diversifying our product range to enhance the support we provide to our customers.

"Jewers has a brilliant national and international reputation, and we're looking forward to working closely with them to develop a partnership that delivers real value to both companies."

Mark Jewers, Director of Jewers' Phoenix range, added: "An alliance with Rhino Engineering Group opens up several market sectors where Jewers haven't traditionally been strong with our Phoenix products, and we relish the opportunity to work with a company we have respected for several decades."

About Rhino Engineering Group

Rhino Engineering Group is the parent company of Rhino Doors, Rhino Site Systems and Rhino HySafe. Rhino Doors provides a comprehensive range of pre-engineered and bespoke, primary and multi-performance rated doors for the protection of national assets.

Rhino Doors has over 25 years' experience in supporting projects in key sectors including Critical National Infrastructure, Rail, and Defence. Major infrastructure projects supported by Rhino Doors include Crossrail and Transport for London's Bank Station Capacity Upgrade Project.

About Jewers Doors

Established in 1983, Jewers Doors is a privately owned, family company dedicated to the design, manufacture and global supply of world-class industrial doors.

In 2021 Jewers moved into a state-of-the-art factory and offices on a new industrial park in Biggleswade, Bedfordshire. Comprising over 50,000 square feet of office and manufacturing space, which incorporates a new panel press line, wet spray paint and blast booths, and a powder coating plant to maintain the highest standards for design and manufacture of its sliding and sliding / folding doors.
